

Vortex SPX™

All Vortex™ spreaders can be used year round for fertilizer, pre-emergent herbicides, insecticides, granular growth regulators, ice melt products and other granular materials.

The Vortex SPX™ units ship fully assembled and ready for use. This lightweight compact unit is maneuverable in small spaces and powerful enough to handle large areas as well. Use the Vortex SPX™ in a utility vehicle, pickup truck, pull cart, wagon or boat. 12 Volt Vibration Kit is standard on the Vortex SPX™

- Hopper Capacity up to 70 Lbs of Material
- All Stainless steel valve components
- Fully enclosed material storage to prevent material from becoming wet
- All welded aluminum, powder coated frame
- Vortex SPX™ series utilizes electronic On / Off flow control
- Fully adjustable valve for varied rate of material delivery
- Non clogging patented delivery system
U.S. Patent #6,883,736 #7,080,961 #7,137,579 #7,337,992
- Extension tubes included for longer delivery pattern
- 8 foot long granular material delivery hose
- Will apply mini prill, standard prill and large pellets
- Easy to use - one person operation
- Unit is palletized for shipping.
- Ships Fully Assembled – Ready to Work
- Valve configured for minimal dust release
- 12 Volt Vibration kit is standard to insure even flow of material in humid conditions.
- Remote switching option separates the valve on/off control from the delivery hose. This allows for variable hose length.
